

The Old Dresser

The old style dresser was the focal point of old kitchen. The dresser consisted of an upper display area which sometimes had glass. Dressers were used to show off China. The lower section was normally made of 4 ~~cupboards~~ cupboards. Dry food was kept in these cupboards. A large jug with milk was kept in the middle section. Dressers were often kept in the centre of the room. Dressers used to be popular. There was ~~know~~ no running water. You would have to go to the well. The plate below is an example of good dishes that were displayed.

The information above was collected through interview my Granny Phil M. Monaghan
